ONLINE CATALOG & APPLICATIONS

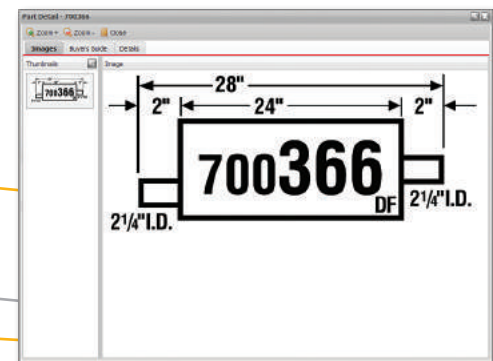

Explore AP's website and mobile app to discover more about our products and the markets that we serve.

Through the online section of AP's website you can view complete OE replacement systems, performance exhaust and catalytic converters.

View up-to-date coverage enhancements, VIN and Plate lookup, and company news.

apexhaust.com

COUNTERPERSON & INSTALLER TRAINING

At AP, we are committed to the development and growth of our customers. As a part of this commitment, we offer online education and training courses for the Counterperson and the Technician/Installer.

These courses are designed to enhance the knowledge base for professionals as they practice their crafts by introducing the many offerings of AP Exhaust Technologies.

elearning.apexhaust.com

THE MANUFACTURING PROCESS

ENGINEERING

ENGINEERING

AP Exhaust Technologies is recognized as one of the world's most innovative producers of aftermarket exhaust and emission systems. At AP, development of these products begins in our engineering technical center

where application research, and the use of state-of-the-art CAD systems, connect with prototyping, and tooling design processes for quicker development and release of new exhaust and emission products.

MANUFACTURING

MANUFACTURING

The minute a part is sold, the process begins for replenishment. AP deploys throughout its 440,000 ft² manufacturing facility a linked production system that consistently produces parts for an on-time delivery to our distribution center. Advanced automation, robotics, and computer controlled equipment assure that quality parts are in position at the right time.

With multiple production areas ranging from steel coil processing, muffler assembly, pipe bending, and catalytic converter welding this modern approach to manufacturing reduces production lead times, and improves the quality of the products and accentuates the responsiveness to AP customer needs.

DISTRIBUTION

DISTRIBUTION

AP's strength is in our consistently high order fill rate maintained across all product lines. From our 250,000 ft² distribution center, daily shipments are processed quickly and accurately assuring that AP customers have the products they need in stock at all times. Using the latest in distribution processes and equipment, AP is leading the way in customer service and delivery.

+Note: For **MANDREL** Bent Pipes use the following:

- For 126102 use **X6102** 2 1/4"
- For 126103 use **X6103** 2 1/4"
- For 126104 use **X6104** 2 1/2"
- For 126105 use **X6105** 2 1/2"

- Ideal For Custom and Dual Installations
- Economically Priced
- Excellent Performance, Sound and Reduced Back-Pressure
- 100% Aluminized Components For Superior Corrosion Protection
- Large Inner Tubes Allow Straight Through Power
- Feature AKDDQ Necks For Easy Modification
- Most Units are Reversible to Limit SKU's
- Large Body 4 1/16" x 10 1/2" and 4 1/2" x 11" Ovals For Light Trucks, Sport Utility Vehicles, Cars and Vans
- Slimmer 4 1/4" x 8 3/4" Ovals to Fit Today's Performance Vehicles
- Smaller 3 1/4" x 7 3/4" Ovals are Also Available to Meet Your Installation Flexibility Needs.

3 1/4" x 7 3/4"

4 1/4" x 8 3/4"

ALUMINIZED TURBO MUFFLERS

5 1/2" x 11"

GLASSPACKS

- Aluminized Heavy Duty, 15 Gauge, 3", 3 1/2" and 4" Diameter Shells
- Spiral Louvered Inner Core Produces a Deep, Mellow Tone, Decreases Backpressure and Increases Performance
- AKDDQ Necks Allow For Easy Expansion
- Single Packs

PART NUMBER DEFINITION

Example: 351811

First two digits = Shell Diameter (35=3.5=3 1/2")

Second two digits = Shell Length (18")

Third Two Digits = Configuration:

00 = Blank

11 = Center/Center

12 = Mild Offset/Mild Offset

22 = Full Offset/Full Offset

Seventh digit indicates neck size greater than 2 1/4":

3 = Two 2 1/2" Necks

4 = Two 3" Necks

Seventh or Eighth digit:

2 = 2 1/4" Core Size

5 = 2 1/2" Core Size

6 = 3" Core Size

X - Pipes

- Mandrel Bent
- Aluminized Steel
- Available in 3 Sizes

Universal X-Flow pipes increase horsepower and reduce noise levels. They work like an H-pipe balance tube, but give your vehicle better performance by increasing exhaust scavenging and balancing the exhaust pulses.

MAX FIT[®]

with Mandrel Options

- Max Fit consists of Universal, Direct Fits, and Dual Conversion Pipes.
- Max Fit Universal Pre-bent Pipe is designed especially for the professional installer who has a pipe bender. With Max Fit Pipes, all of the tough bends have already been made. Just turn the outlet end down to either side, or cut it off – depending on the application. Job times are cut in half, the fit is always perfect and there is never any wasted material.
- Save time, space and money with the Max Fit line.
- All Max Fit pipes are 100% aluminized and produced using heavy 14-16 gauge O.D. steel, and re-aluminized weld seams to prevent corrosion.
- Premium Mandrel-bent pipe options maximize gas flow and product life.
- Selected Mandrel pipes are also available in 409 stainless steel.

ELBOWS

WELDING OF ALUMINIZED MATERIAL

Gas Welding

1. Adjust gases until there is a small soft blue flame extending beyond the inner cone $\frac{1}{8}$ " to $\frac{1}{4}$ ".
2. Use an AWS (American Welding Society) Number ER 70S-2 welding rod or the equivalent. This rod has extra elements added to cause the aluminized coating to float on top of the molten puddle away from the inner weld structure.

Tig Welding

Use the same type welding rod as gas welding with argon purge gas.

Mig Welding

For typical exhaust components, use a copper clad, .035 inch to .045 inch diameter wire. Specifically use a low carbon steel wire, AWS Number 70S-3 or the equivalent.

FLEXIBLE TUBING

PROCEDURE FOR CUTTING FLEXIBLE TUBING

NOTE: Flexible tubing coils are in a contracted state. Before cutting, anchor one end and pull and/or snap the coil to bring it back to its proper length.

HACKSAW: (For less frequent cutting)

WIDTH: ½" or ¾"

TEETH: A no set blade is preferred, although it is usually hard to find locally - 14 tooth or finer.

BANDSAW: (For less frequent cutting)

WIDTH: ½" or ¾"

TEETH: A no set blade - 14 tooth, run at 350 feet per minute.

A bi-metal blade gives more cuts per dollar than an ordinary carbon steel blade.

Lenox seems to be the best blade for our applications.
