# INSTALLATION REQUIREMENTS

Aftermarket OBD II converters may be installed only in the following situations:

1. The converter is missing from the vehicle. (or)
2. A state or local inspection program has determined that the existing converter has been lead-poisoned, damaged or otherwise needs replacement. (or)
3. The vehicle is more than seven (7) years old or has more than 70,000 miles on it, and there is a legitimate need for converter replacement that has been established and documented.

NOTE: Vehicle OEM catalyst warranties range from 7 years / 70,000 miles to 15 years / 150,000. Ensure the vehicle has exceeded the OEM catalyst warranty. Installers can verify this by referring to the owner's manual or vehicle manufacture representative. In order to establish and document that the circumstances permitting replacement of an original or missing converter with an aftermarket converter, the installer MUST include on the service invoice:

- The customer's name and complete address
- The make, model, year and mileage of the vehicle
- The stated reason for replacement

Where a state or local government has determined that a converter is damaged or needs replacement, a proper government representative indicates that the converter should be replaced and attaches a note to the invoice.

Where the replacement need has NOT been verified by a proper state or local governmental representative, the customer and a representative of the service or repair facility must sign a statement verifying that replacement is justified.  This statement is on the first page of the CATALYTIC CONVERTER LIMITED WARRANTY REGISTRATION (see diagram on next page).

INSTALLATION STATEMENT

Catalytic converters are emission control devices which are designed to last the life of the vehicle and do not normally require replacement. Furthermore, if the vehicle is properly used and maintained, original converters are covered by the emissions control warranty for 7 years or 70,000 miles for 1996 models and newer, if there is a legitimate need for converter replacement that has been established and documented.

In order to verify that the proper circumstances exist, the owner of the vehicle on which such repairs are made and facility representative must sign the following statement.

❑ The vehicle is over 7 years old or has more than 70,000 miles on it for 1996 models and newer and the catalytic converter required replacement because_____

OR ❑ The vehicle's catalytic converter was missing when the vehicle brought in.

Owner's Signature_____ Date_____

INSTALLATION FACILITY COPY

The converter must be:

1. In the same location as the original converter.
2. The same type of converter as the original converter (i.e. oxidation, three-way or three-way with air).
3. The proper converter for the vehicle application as determined and specified by the manufacturer.
4. Connected properly to any existing air injection components or oxygen sensors on the vehicle. Oxygen sensor(s) must be in the same location as the original.
5. Installed with all the other required converters for the particular application if more than one converter was installed originally by the vehicle manufacturer or, in the case of new aftermarket converters, if more than one converter was specified by the converter manufacturer.
6. After replacement converter installation the OBD II system fault memory must be reset. Vehicle then needs to be operated until all readiness status monitors are enabled or ready.

# California Air Resources Board (CARB) Guidelines for a Proper Repair

- Discuss Vehicle Drive-ability Issues with Your Customer
- Drive The Vehicle
- Ensure Engine is Tuned and Operating Properly:
  - Inspect Front $O_2$ Sensor(s) for Proper Activity
  - Scan for DTC Error Codes, Current, Pending, Historical
  - Check Wiring, Plugs and $O_2$ Sensor(s)
  - Check For Leaks, Intake/Vacuum and Exhaust
  - P0420 or P0430 DTC's Indicate a Condition Where The Converter Can Not Function Properly
  - Inspect The Converter(s) For Apparent Signs of Overheating (Discoloration)
  - NOx Failures Are Generally Associated with Excessive Combustion Chamber Deposits
  - Determine If The Engine Needs An Injector or Combustion Chamber Cleaning. Clean Before You Replace!
  - The Installer Must Always Use The Converter Designated by The Manufacturers Application Guide
  - No Substitutions Allowed.

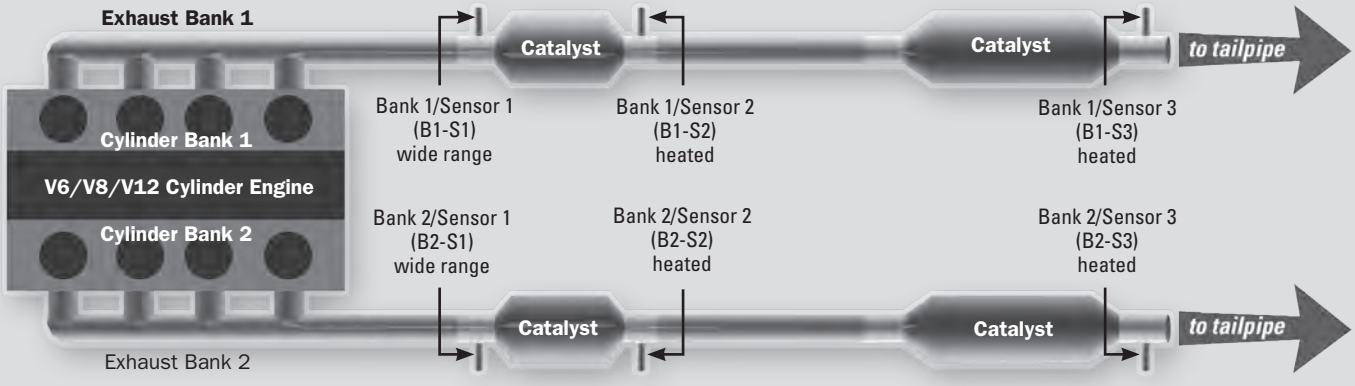

---

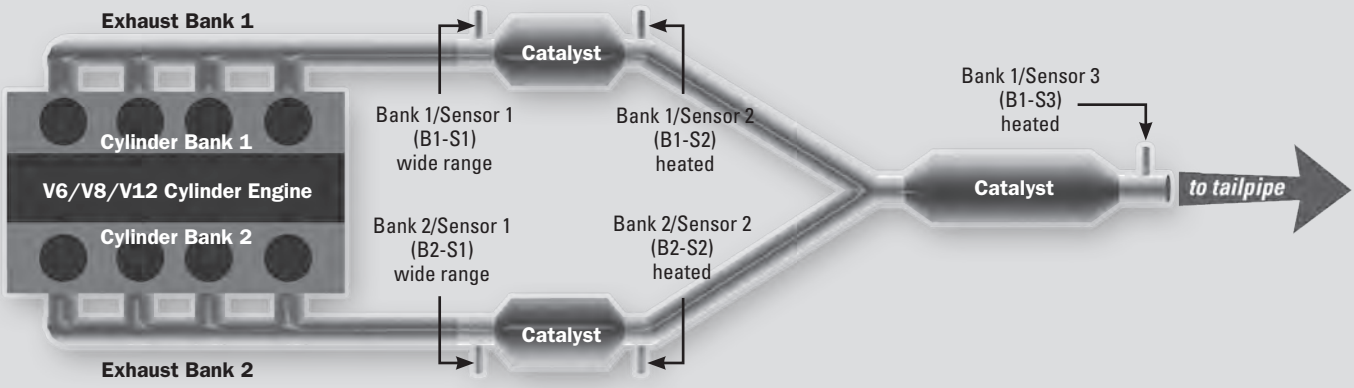

*NOTE: Manufacturer assumes no liability for damage or failure of a catalytic converter due to installation on an improperly tuned or maintained engine.

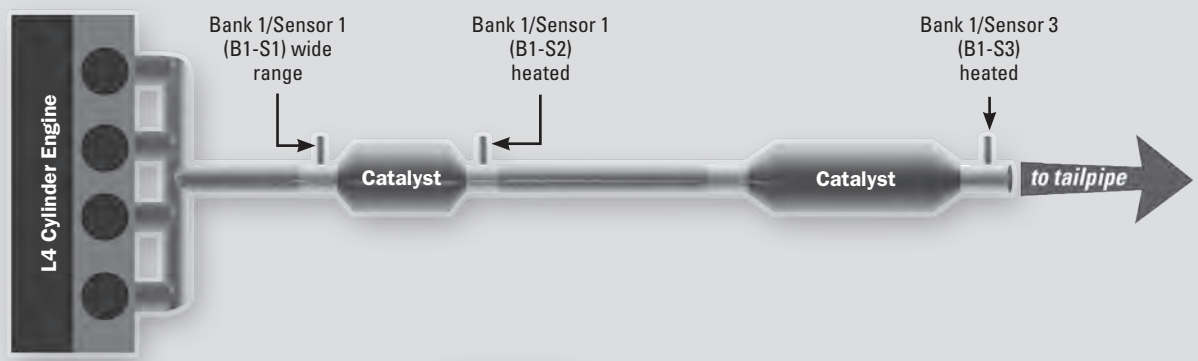

Allow sufficient time for hot converter to cool completely before handling.
